Art. 64.29 Rototraslante

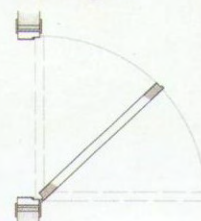

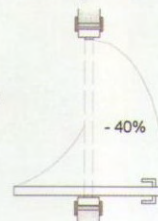

ITA Rovere tinto miele
ENG Tint oak

Movimento porta rototraslante
Movement pivot-sliding door

Movimento porta battente
Movement hinged door

ITA Il movimento rototraslante avviene su entrambi i lati, e consente di impegnare un'area minore rispetto a quella occupata, nelle fasi di apertura e chiusura, dalle porte a battente.

ENG The pivoting-sliding movement is in both directions, yet for less space is occupied during opening and closing than with normal hinged doors.

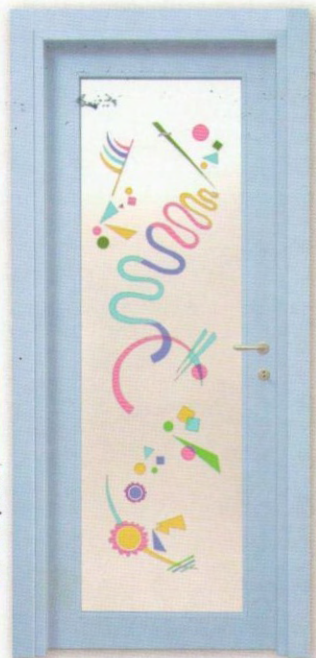

Tutti i modelli possono essere realizzati in qualsiasi essenza. All the models we can be made in any wood
