  Single Selection Mode - for fast vending
  Shopping Cart Mode - Lift sales with up to three item purchases via one transaction (with supporting payment systems)
- **Calorie display of product before purchase**
- **Browse mode for viewing product information by product category**
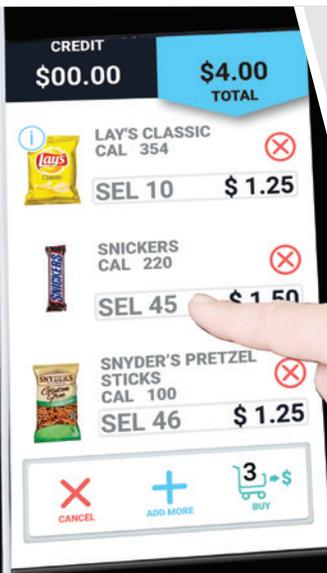

←inDEX→

inDEX HAS GONE TO THE CLOUD

The inDEX product planogramming and information management tool is now web-based and features a global product library.

- **New Global Product Library**
  Develop your own comprehensive library of products with access to a global database of products from the manufacturers and features nutritional information and product images.*
- **Remotely Planogram Your Machines**
  Each machine can have it's own unique product list by selection. Update promotions, calorie information and preset pricing.
- **Supports Two Line GVC2 Displays**
- **Supports New iCart 10.1" Touch Screen**
- → **Promotes Products and Specials**
  Increase sales with promotions, combo specials and limited time offers with up to three advertising screens.
- → **Supports iCart Browse Feature**
  Create product categories for quick pre-purchase browsing of product information.
- → **Combo Feature**
  Create up to five different combinations.
- **Web Browser Friendly**

*inDEX is a data access capability. The global database of products, nutritional information, and product images accessed by inDEX is maintained by third-party product manufacturers, and Federal Machine makes no representations or warranties of accuracy or completeness of data.
